The 2d, 5th, and 8th Columns, shew the Times when the Eclipses will happen; the 3d, 6th, and 9th, the Kind. Thus, on the 10th of January, at 4h. 44m. in the Evening there will happen an Emersion of the first Satellite; and the Number 1, which is placed against the 10th of January in the 1st Column, refers to the Number 1 in the 1st Column of the *Plate of Configurations*, against which is placed the *Correspondent Configuration*, or the Form in which the Satellites will appear at that Time.

IV. A

The Configurations of Jupiter's Satellites, at the Time, their Eclipses as are Visible at London, will happen in the
by James Hodgson F.R.S. Master of the Royal Mathemia
